

Sasquatch ran across US 27 holding an infant

Sighting Details:

Date: 06/1991

Time of Day: 4:00pm

Season: Summer

State: Florida

County: Levy

Nearest town: Bronson

Nearest road/Highway: US 27

Weather Conditions: Sunny and clear weather traveling east, sun was to our back

Terrain of location: Heavy jungle about 60 feet from the road on both sides

Anything else odd: N/A

Other Witnesses: 3, one was driving the Dodge window van the other 2 were looking down the highway

Local Stories: N/A

Submitted by witness on: Monday January 22, 2001

Original report:

I saw a bigfoot while driving between Bronson and Williston on 27 East in June of 1991. It was about 4:00 in the afternoon, it was a clear and sunny day. The bigfoot ran about 100 yards across the road in about 20 seconds. It was about 70 yards ahead of us, it appeared to be carrying a small bigfoot child in its arms, it appeared to be about 8 feet tall and completely covered in hair.

Follow up Investigation by: David S

I have talked with the Mr. S (the one who was driving) over the phone on 3/13/01. I asked him a few questions about his encounter. He said that the Bigfoot ran from his right to left. The road he was driving was a four lane road with a median that was over grown. Thick woods on both sides of the four lanes. Mr. S said that they had a clear view of the creature as it ran across the road, and that it looked to be carrying a small one in its arms. Mr. S said that it had arms like "Us" and that it was carrying a childlike "We" would do in its arms. He said it took one look at us and kept going into the woods. Between the woods (on his right) and the median Mr. S said was around 100 yards and it only took a few steps and it moved fast.

The other witnesses also saw the creature as it moved, and all say that it had to of been a Bigfoot the way it looked and moved. They said, that this was no bear. Not on two legs and moving like it did. Mr. S was around 70 yards in front of it as it went across the road. To this day, he said he's never seen anything like it before. He has seen shows on Bigfoot on Discovery etc. but never thought he would see one for himself.

There have been a few reports in that general area of FL. The Gulf Hammocks is pretty close to this area and very thick with forest. I have heard of a few stories about hunters being out there and hearing sounds that they never heard before.
